

Roland DGA Solvent Satin Canvas: ESM-SSC2

Product Overview

Roland DGA ESM-SSC2 is a high-quality, true artist canvas with a satin finish. This 65% polyester/35% cotton blend is 22 mils thick and 11.5 oz/sq. yd. (390 gsm). It is durable, waterproof, and can be stretched without cracking. It also has excellent archival properties. This solvent-printable canvas has a specialized acrylic coating that yields superior color brilliance and excellent image definition.

Storage Conditions

ESM-SSC2 Roland DGA Solvent Satin Canvas should be handled with care to prevent surface contamination that may affect the printable surface of the product. This material should be processed and stored in an environment of 65° - 85° F (18° - 29° C) and 30 - 50% relative humidity (non-condensing) that is clean and relatively dust-free. We recommend storing this product in its original packaging in a cool, dry area until ready for use. If storage conditions are outside the recommended operating ranges, allow the material to acclimate to the production environment for at least 24 to 48 hours before use.

Roland Certified Media Guarantee

This product is sold for the usage of the applications stated in this document. Please note that canvas is a natural product that may expand or shrink with environment. Liquid laminates can be used, but it should be pre-tested since some may cause yellowing or cracking over time.
